

EDUCATION

Massachusetts Institute of Technology

M.S. Mechanical Engineering, GPA: 4.90/5.00

Cambridge, MA

2020–2022

- Advisor: Prof. Alberto Rodriguez
- Thesis: “Estimating Global Object Pose from Tactile Images”

University of California, Berkeley

B.S. Mechanical Engineering, GPA: 3.89/4.00

Berkeley, CA

2015–2019

RESEARCH EXPERIENCE

MCube Lab @ MIT

Graduate Research Assistant

Cambridge, MA

2020–Present

- Advisor: Prof. Alberto Rodriguez
- My ongoing research is a probabilistic tactile perception algorithm with three primary strengths. First, it accurately tracks global object pose through unique streams of tactile images. Second, it is fast enough to ultimately inform real-time control of an in-hand manipulation sequence. Third, it quantifies the uniqueness of a tactile trajectory to assign solution confidence.

Dynamics @ Berkeley

Undergraduate Research Assistant

Berkeley, CA

2019

- Advisor: Prof. Oliver O'Reilly
- Derived equations of motion and developed Matlab simulations to understand spontaneous jumping phenomena and unusual gliding behavior of a weighted hoop. Published findings in the Royal Society: *Proceedings A* (Fall 2019).

Berkeley Emergent Space Tensegrities (BEST) Lab

Undergraduate Research Assistant

Berkeley, CA

2016–2019

- Advisor: Prof. Alice Agogino
- Formed and led a team of four undergraduates to design a tensegrity robot that uses inertial mechanisms, rather than cable actuation, for locomotion. Presented findings at 2019 SURF conference.

PUBLICATIONS

1. M. Bauza, **A. Bronars**, Y. Hou, N. Chavan-Dafle, and A. Rodriguez, “simPLE: a Method Learned in Simulation to Precisely Pick, Localize, and Place Objects without Prior Interaction”, in preparation.
2. M. Bauza*, **A. Bronars***, and A. Rodriguez, “Tac2Pose: Tactile Object Pose Estimation from the First Touch”, *IJRR 2022*, under review.
3. **A. Bronars** and O. O'Reilly, “Gliding Motions of a Rigid Body: The Curious Dynamics of Littlewood's Rolling Hoop”, *Proceedings of the Royal Society of London A: Mathematical, Physical and Engineering Sciences*, 2019.

PRESENTATIONS

1. **A. Bronars**, Y. Chen, H. Gamliel, and F. Cuellar. “Tensegrity Locomotion Using Inertial Mechanisms”, *SURF 2019 Conference, August 22-23, 2019, Berkeley CA*.

FELLOWSHIPS AND AWARDS

- **Steidel Award** for Undergraduate Research 2019
 - Awarded to one graduating senior in the UC Berkeley department of Mechanical Engineering for commitment and ingenuity in undergraduate research.
- **Drake Scholarship** for Mechanical Engineering 2015–2019
 - Four-year full-ride academic scholarship for top 10 incoming UC Berkeley ME students.
- **SURF Rose Hills Independent Undergraduate Research Fellowship** 2019
 - Summer research fellowship awarded for original undergraduate research in STEM.

WORK EXPERIENCE

- | | |
|--|------------------------------|
| Apple
Mac Product Design Internship | Cupertino, CA
Summer 2018 |
| <ul style="list-style-type: none">– Designed computer parts and mechanisms for the next generation of Mac products– Intern project selected as best-in-cohort, escalated to Senior VP of Hardware Engineering | |
| Apple
Global Commodity Management Intern | Cupertino, CA
Summer 2017 |
| <ul style="list-style-type: none">– Manufacturing and supply chain analysis for metal component parts– Intern project selected as best-in-cohort, escalated to VP of AppleCare | |
| UC Berkeley Mechanical Engineering Department
Course Reader, Lagrangian Dynamics | Berkeley, CA
Fall 2019 |
| <ul style="list-style-type: none">– Wrote solutions for problem sets, and graded problem sets and exams. | |

MENTORSHIP

- **Women’s Technology Program** at MIT 2021, 2022
 - Mentored week-long project on prosthetic device development for high school students
- **Undergraduate Students**
 - Shreya Skarpoor - Nonparametric filtering techniques for tactile perception (2022)
 - Claudia Lozano-Perez - Machine learning methods for tactile perception (2021)
 - Ying Ying Chen - Mechatronic design for tensegrity robot hardware (2019)
 - Hadar Gamliel - Software development and control system design for tensegrity robot (2019)
 - Felipe Cuellar - Mechanism design and failure analysis for tensegrity robot hardware (2019)
